G12H

If the G12M was to become a classic, it was the G12H with its heavier magnet that really characterised the sound of rock guitar for the new breed of player that emerged in the 1960s. Listen to any Hendrix recording and the chances are you're hearing the unmistakably creamy tones of the G12H. Originally available in two versions – low resonance for bassists and high resonance for guitarists – both were in fact embraced by guitar players for their unique tonal characteristics.

The new Celestion G12H is a perfect recreation of the low resonance model, right down to the voice coil former material, glue formulations and vintage, solder-only tag panel. Suitable for use in all cabs, it exudes thick, syrupy tones with a deep, growling bottom end.

8Ω FREQUENCY RESPONSE

GENERAL SPECIFICATIONS

- Nominal diameter 12", 305mm
- Power rating 30W
- Nominal impedance 8Ω & 15Ω
- Sensitivity 100dB
- Chassis type Pressed steel
- Voice coil diameter 1.75", 44.5mm
- Voice coil material Round copper
- Magnet type Ceramic
- Magnet weight50oz, 1.42kg
- Frequency range 55-5000Hz
- Resonance frequency, Fs55Hz
- DC resistance, Re 6.53Ω & 12.11Ω

MOUNTING INFORMATION

- Diameter 12.2", 309mm
- Overall depth 5.3", 135mm
- Magnet structure diameter 6.6", 168mm
- Cut-out diameter 11.1", 283mm
- Mounting slot dimensions 0.31", 7.9mm Ø
- Number of mounting slots 4
- Mounting slot PCD 11.7", 297mm
- Unit weight 10.4lb, 4.7kg
