

MARCONI 6-VOLT VALVES

S 610, Screen Grid, 20/-

S610 is a high efficiency screen grid amplifier equally suitable for use in single H.F. stages and in multi-valve instruments.

H 610, High Magnification, 8/6

H610 is a high magnification type for use as detector or initial L.F. amplifier followed by resistance or low ratio transformer coupling.

Marconi HL 610, 8/6

HL610 is the general purpose valve of the 6 volt range. It is an excellent detector and H.F. or L.F. amplifier.
